PROFESSIONAL SUMMARY

A Junior Platform Engineer with expertise in CI/CD, Infrastructure Automation, and Cloud Deployment Skilled in Azure DevOps, PowerShell, and Bicep for scalable cloud solutions and worked on Antivirus Installation, IP Configuration, Troubleshooting and OS Installation as part of a work. Currently expanding knowledge in DevOps and Networking including Git, Jenkins, Docker, AWS and Linux to enhance automation and deployment workflows.

EDUCATION

Vels University Master of Computer Application (MCA) CGPA: 8.5/10	<i>June 2021 - May 2023</i>
Vels University Bachelor of Science in Computer Science (BSC CS) CGPA: 6.9/10	<i>June 2018 - May 2021</i>

TECHNICAL STRENGTHS

Programming Languages	C
Libraries & tools	Azure DevOps, VS Code, CI/CD Pipelines, Infrastructure as Code (IaC), AWS
Tools & Technologies	Bicep, Azure Monitor, Windows OS Installation, Antivirus, IP Configuration
Version Control	Git, GitHub

RELEVANT COURSEWORK AND CERTIFICATION

- Prompt Engineering,
- Azure Fundamentals AZ 900,
- Azure Administrator Associate AZ 104,
- MS Security, Compliance and Identity Fundamentals SC 900,
- Azure AI Fundamentals AI 900.
- DevOps Course

EXPERIENCE

Elastacloud <i>Junior Platform Engineer Azure Cloud & DevOps</i>	<i>December 2023 - Nov 2024</i>
• Platform Maintenance & Support: Monitor and maintain cloud platforms and infrastructure to ensure optimal performance and reliability. • CI/CD Pipeline Management: Designed, built, and optimized CI/CD pipelines for seamless software delivery and deployed a working pipeline • Infrastructure Automation: Create and manage automation scripts for infrastructure deployment using tools like Azure DevOps, Bicep, or PowerShell. • Support: Installed, configured, and maintained operating systems and application software across user systems, ensuring optimal performance and compatibility. Provided remote desktop support to end-users for technical issues, delivering timely troubleshooting and resolution. • Configured and managed IP addresses, network connectivity, and system settings to ensure seamless communication and functionality. Conducted regular system updates, software patches, and preventive maintenance to maintain security and system efficiency.	

PROJECTS

Azure Infrastructure Automation using Bicep and Azure DevOps Pipelines

Dec 2023 – Nov 2024

Description: Designed and implemented an automated Azure infrastructure deployment solution using Bicep and Azure DevOps Pipelines, following best practices for naming conventions, tagging, and resource management.

Key Responsibilities:

- Worked on Installing OS and Application Software, Troubleshooting, Outlook Configuration, Folder and File Permission, Setup IP Address, Remote Desktop and Troubleshooting.
- Ensured compliance with organizational naming conventions and tagging policies.
- Troubleshoot and optimized deployment issues to improve efficiency.
- Reduced manual Provisioning time by 15% using Bicep Automation.
- Optimized CI/CD Pipelines, reducing deployment failures by 20%.
- Improved system uptime by 10% by automating monitoring process.

Technologies Used: Azure DevOps, Bicep, YAML, Pipelines, PowerShell, Azure Resource Manager (ARM), Git, OS Installation, Networking.
